

CERTIFICATE OF COMPLIANCE – Phthalates-Free Declaration –

Nexperia B.V. certifies that its semiconductor products do not contain any intentionally added phthalates listed under EU REACH¹ Annex XIV (Authorization List) or EU REACH Annex XVII (Restriction List). This includes Appendix 6, which covers reproductive toxicants classified as Category 1B under Entry 30, and Appendix 12, which includes phthalates regulated under Entry 72 of Annex XVII. In the event of any unintended presence, the concentration remains within the limits and conditions set by EU REACH. For further details, please refer to our Statement on EU REACH Provisions.

Additionally, Nexperia strictly controls all phthalates, including their salts and esters, as prohibited substances, limiting their maximum allowable concentration to 100 ppm at the homogeneous material level per XPR-0007 in semiconductor products and their packaging. As specified in XPR-0009, incoming materials undergo third-party analytical testing for phthalates regulated under EU RoHS 2 amended.² Compliance with XPR-0007 and XPR-0009 is mandatory for all Nexperia suppliers, as stipulated in our Supplier Code of Conduct.

The signature below confirms that the above statements, including any product composition data, are valid and accurate to the best of our knowledge. Nexperia has implemented robust compliance systems to ensure adherence to global environmental regulations and laws. However, we cannot guarantee that all materials in our products have undergone independent verification of their substance content. In the event of any disputes or liabilities arising from the information in this document, Nexperia's standard terms and conditions of sale shall apply, unless an alternative contractual agreement has been established in writing by both parties.
